

**MEDIA LITERATE TWINNERS
IN DIGITAL AGE**

Notre bilan "Media Literate Twinners"

1 AMC 2021 !

As far as we are concerned, before going to High-school, we hadn't ever mentioned media literacy. This year, as a student who chose to study political, I get to be introduced to media literacy way more often. It is always interesting because we use media every day and it is good to understand it very well. But on another point of view, with all the subjects that I chose, I don't have the opportunity to talk about media literacy: in maths for example.

Kasım Ekenler Multi Program Anatolian high school

It was a fun and useful project. We learned a lot about technology and its use. I am very pleased to take part in this project and share our ideas with our friends. I would like to thank our teachers and friends. I am very happy to take part in a very enjoyable project. 😊

whatever we did was creative and interesting. Plus, seeing how much effort everyone putted into the work was amazing !

all around the world. In my opinion it was a useful project and the activity that I preferred to do was the video about the world sport news.

Laura, Descartes Highschool

This project was very interesting because it allows us to do some group activities : it was very fun because we had to be creative and organized. Moreover it was a great opportunity to be in collaboration with students who come from other countries. I could also learn new things about media literacy and I improved my writing English skills.

thomas
 I think it was a great project and very different that we are used to make in class. It's a great innovation and it's also very productive to work with all of you. The project is not a "scholar" one, it's really a work with real sense, not just for marks and learn.

İlayda Y. /Hasan Türek Anatolian High School

Hi everyone, I'm so happy to join this project. I learned a lot of things about media literacy and technology. I had some knowledge about web 2.0 tools. And also this project improved my English. We had lots of friends from another countries. Thanks for everything.

ISMAEL

I found this project interesting but sometimes complex at the level of the achievements because

Sopheape [Lycée Descartes]

Hello !
It is the end of this project and I learned so many things from it. I am grateful I could be part of this project because it permits to turn ourselves towards the world. I enjoyed doing researches by myself (and alos with my group) to make posters, videos bulletins... etc

Jonathan Lycée Descartes

I really appreciate this project because i learned lot of things about the information. I learned also new words. Moreover our activities made was very interesting especially the video about sports !

Natalia - Descartes High school

Hi everyone!
I am very grateful to have been a part of this wonderful project. We did a lot of entertaining works, I especially appreciated the ones with violence. It also allowed me to learn a lot about media literacy, and helped me improve my English, so this project was very useful. Thank you!

working on media literacy

eloane.d [French high-school]

Hello! I wanted to say I really enjoyed participating in this project. It was a lot of fun and working with other countries was great! I found it really interesting to work on this project, Thank you for letting us participate in the project with you! :)

rabia.gülnazteacher Kasım Ekenler Multi-Program Anatolian High School

I'm so proud to be on this project. He's contributed a lot to me. We've learned to use the media the right way and we've informed people to use it correctly. In short, it was an educational and instructive project. I would like to thank my teammates and all the teachers who guided us.

ALMANSHYA SECONDRY SCHOOL FOR GIRLS

I am happy because I got to know new students and new acquaintances from different countries and also used modern technology tools and different applications such as canva and book

am glad to be part of it.

Mohamed.A

I think this project was very interesting because we learn a lot of things about the other student who participate in this project. It was good to see the work of everyone because there is lot of different work and this difference allowed us to learn more about the way that we learned english in other country. And surtunly this project allowed us to progress in english!

My participation in the project was unique. I've met new friends. My students met students from different cultures... My students also know the right ways to know the right media information. And the distinction between types of news... My students also used modern technology tools... Thank the institutions. For this project. And I'm glad I was a partner with them.

Fadimeana Çelebi/Zübeyde Hanım Vocational and Technical Anatolian High School/Düzce

We did great things with my students in this project. Our students got in touch with their friends from different cities and countries. They added new information to their knowledge of media literacy. Thanks to this project, our students research and critically

Actually I want to say that this project added to me and my students a lot of things which is valuable and in short time. First, it was an opportunity to exchange ideas and information and to have new experiences . Second, it provided us with communication skills ,we have made friends and have met them online and have already known about their culture and their education system. Third, this projects provided me and my students with new technology skills when using Web 2.0 TOOLS which enrich our information and will affect the way we teach different subjects at school.

Dear partners, First of all, I would like to thank you all for your contribution to this project. I did so much research on this subject before applying for the project. But I wasn't sure if I could handle it. Then we started our project journey with u. I said here is the perfect team! Media literacy is an important issue for all people. This project gave me and my students very good information about becoming media literacy. We now know well what to do in matters we do not know. We are questioning, researching, discovering, analyzing. We do not accept any information that we are not sure about, that we do not investigate. I'm sure everyone has learned a lot in this project. I am very happy to work with you.
